

Open call to the GEO community: Contribute to the World Environment Situation Room by sharing your in situ data

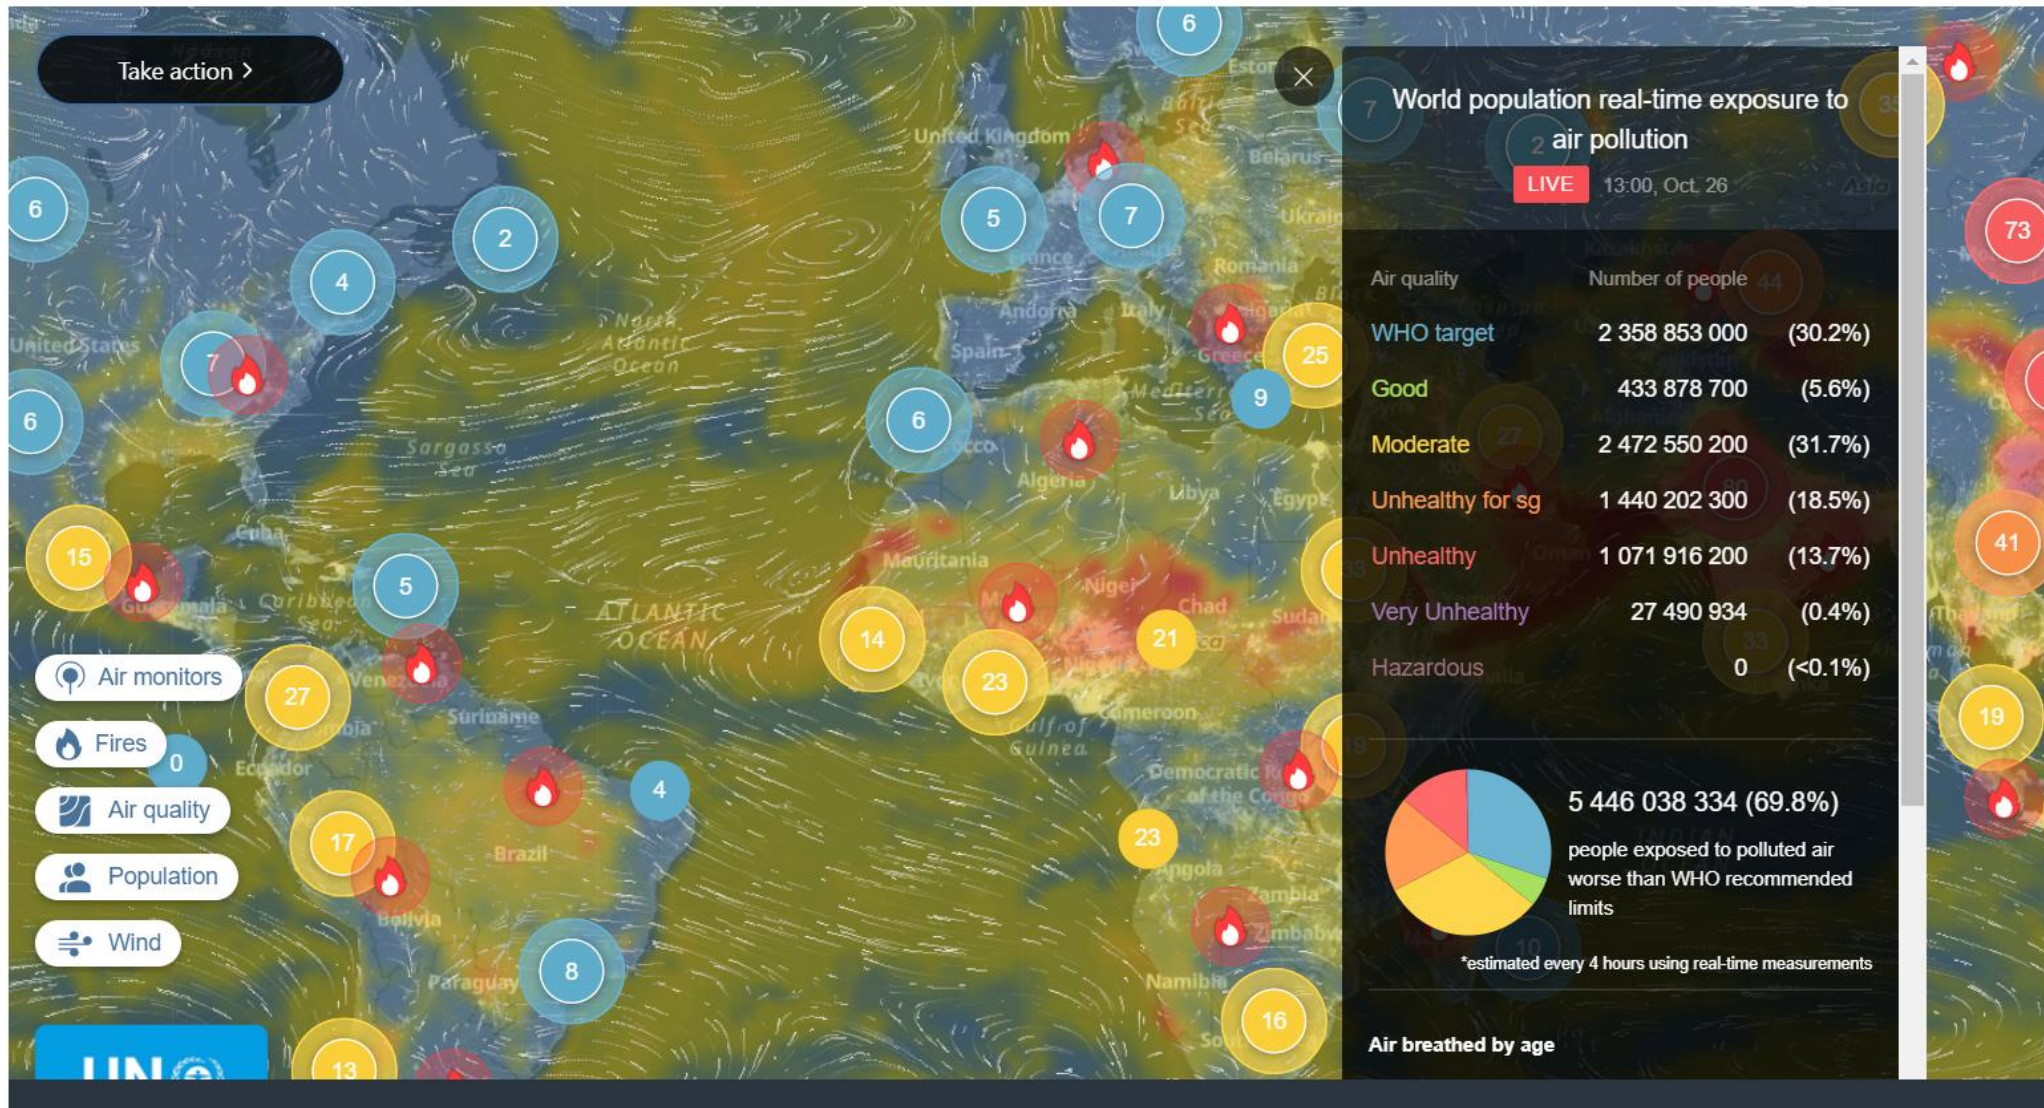

News / 1 October 2020

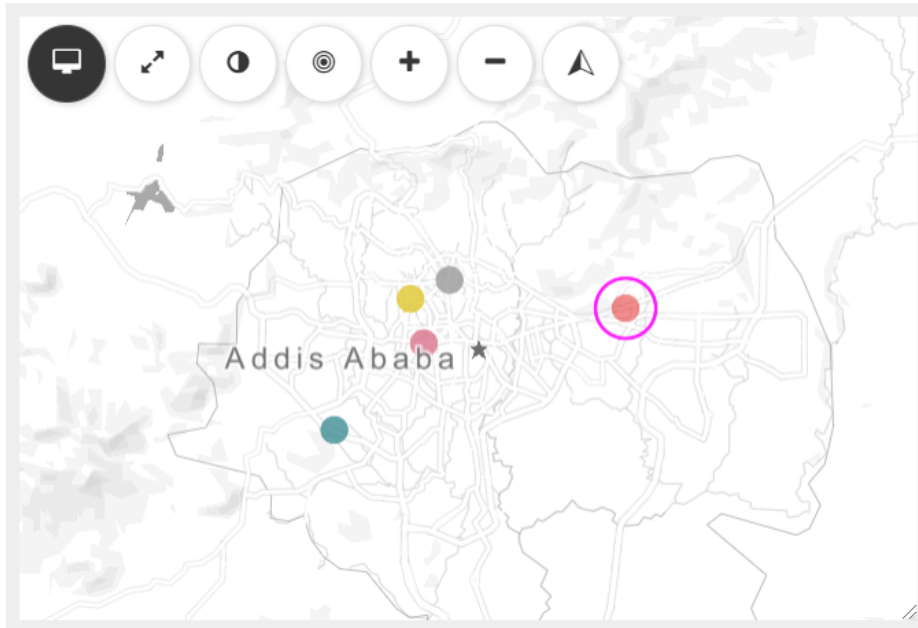

<http://earthobservations.org/article.php?id=463>

World Environment Situation Room (WESR)

- UNEP initiative to bring information about the environment to a wide audience (domain experts, policy makers, scientists, business, citizens).
- (Near) real-time, trusted data of various types (geospatial, economic, progress on MEAs etc...).
- Supported by MapX.
- Designed to be interactive (dashboards, graphs and other visualization tools).

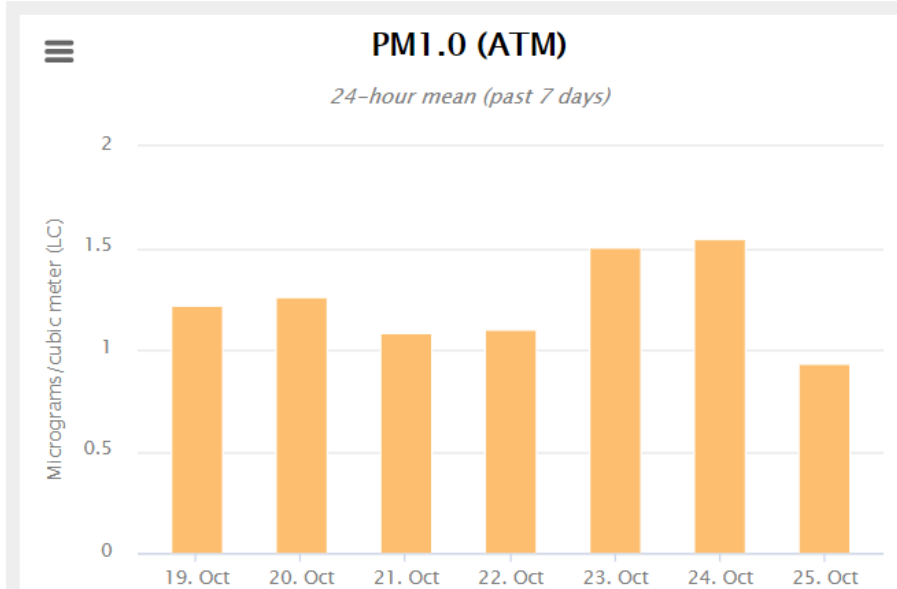

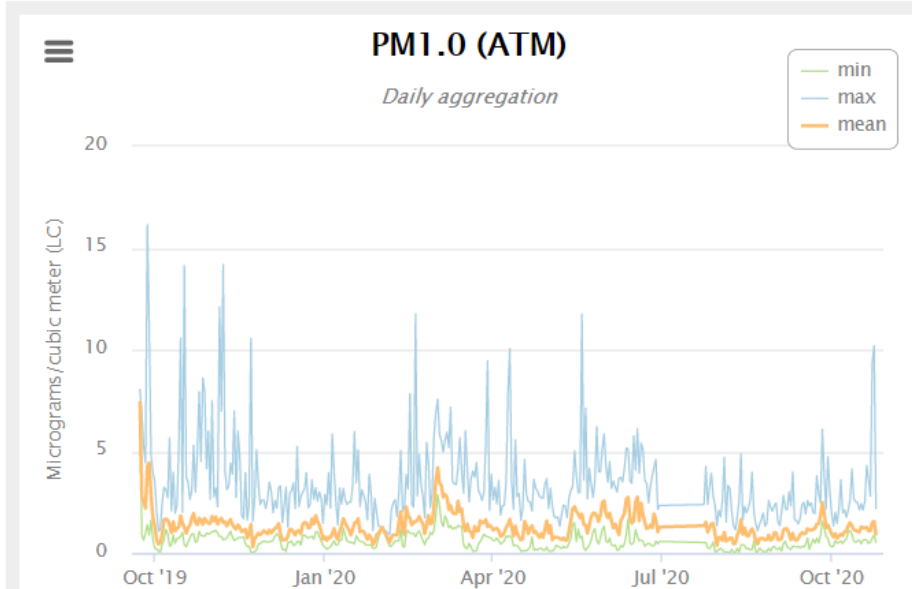

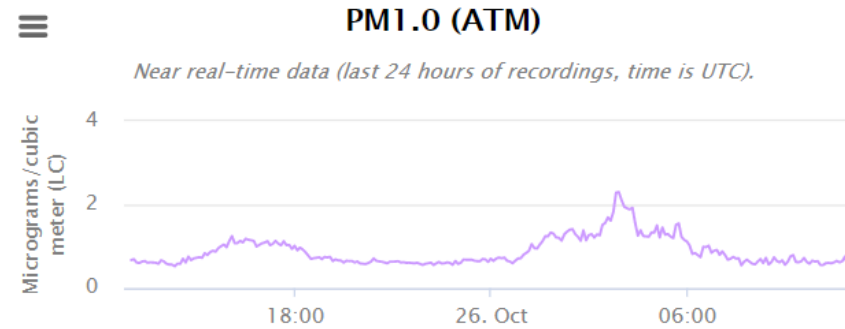

Air quality

Selected site: 231ADDABA005

Parameter: PM1.0 (ATM)

Links with the GEO community ?

- Open call to identify potentially interested GWP activities, POs and associates.
- Bringing the GEO community expertise in thematic areas.
- Higher visibility of data and products generated by GEO.
- Access to spatial data infrastructure (MapX) & data visualization tools.
- Showcase effective sharing of in situ data.
- If interested, please contact ffranziskakis@geosec.org
(cc. secretariat@geosec.org)
